Evening Brief

Date: Thursday October 1st, 2020

Weather Summary

This week will be characterized by a significant warming/drying trend, as an unusually strong high-pressure ridge along the West Coast will build eastward across the Great Basin, continuing through this coming weekend into early next week. Afternoon temperatures will be 5-10 degrees above normal, along with afternoon humidity levels ranging from 6-12% across the southern half of the Great Basin, and 16-23% across most northern areas. Poor to moderate overnight RH recovery can also be expected through early next week. Fortunately, no strong winds, or lightning are expected during the next 7 days. However, there will be occasional N-NW wind gusts of 20-30 mph in areas across Utah where topography enhances northerly winds.

Preparedness Levels & Great Basin Fire Activity (from WFDSS)

Great Basin	PL 3	Light Initial Attack Activity
National	PL 4	New Fires and Acres: 18 fires for 5.8 acres. 476 acres Large Fire Growth

Fuels/Fire Potential

*** Fuel and Fire Behavior Advisory Remains in Effect for Parts of Idaho, Eastern and southern Nevada into Utah ***

Recent moisture and cool temperatures across northern and eastern areas has raised fuel moisture across the mountains of Idaho and Western Wyoming, where ERC's returned to near late September normals.

However, the continuation of above normal temperatures and very dry conditions will bring about more rapid drying of fuels across all areas of the Great Basin, including Idaho and Wyoming. Fuels in the southern half of the Great Basin are still near record level dryness. Fuels in northern areas will likely approach critical levels again by this weekend or next week.

Live Fuel moisture in low elevation brush remains critically dry, between 60-100% in most areas, which correlates with extreme fire behavior.

Resources:

Aviation within the Great Basin

- 1 VLAT, 3 LATs, 0 CL-415
- 15 SEATs, 0 FB, 9 AA, 1 ASM, 0 LP
- 9 Type 1 Helicopters / 9 Comm.
- 8 Type 2 Helicopters / 8 Comm.
- 18 Type 3 Helicopters / 11 Comm.

Crews Committed within the Great Basin

- 7 IHCs / 1 Available
- 12 Type 2IA / 0 Available
